## Providing The Answers Your Customers Need Can Result In Higher Conversions

Increasing the average time a potential customer spends on your website is a hindrance faced by many small business owners. It is commonly known that increase in time spent on a site can result in higher conversions. However, one of the reason most visitors exit a website is due to their inability to find relevant information quickly.

Providing the answers to questions that your visitors are searching for is an effective way to keep visitors interested with your product or service.

SitePal's new Frequently Asked Questions (FAQ) solution allows you to easily place a speaking character on your website allowing you to provide the answers to the questions your visitors have. Additionally, a speaking character can also point them to valuable informative resources or prompt them to contact you with any additional questions they may have.

SitePal's FAQ Solution is only available in Silver and Gold packages. Don't have a SitePal Silver or Gold package? [Upgrade Today!](#)
